- Nameservers
- Security
- Subdomains
- Renew

Every domain requires a set of nameservers to allow visitors on the Internet to reach it. Normally, you should not need to change your nameservers from the defaults. If you do need to change your nameservers, you may do so below.

Update Name Servers

Use default name servers

Nameserver 1

ns1.domain.com

Nameserver 1

ns2.domain.com

Use different name servers

Nameserver 1

Nameserver 2

great .COM domain.
